

YOUR PUPPY'S FIRST 8 WEEKS

This is not an ALL-INCLUSIVE list, but a general overview of what is being introduced and when.

3 DAYS- 2 WEEKS

- Early neurological stimulation begins at 3 days of age
- Puppies are cuddled for short increments of time throughout the day but spend most of their time with mom at this point

WEEK 2 AND 3

- Pen is split into two parts, one part for sleeping and the other for going to the bathroom.
- Simple sounds are introduced
- New textures are offered in their bedding space periodically; such as a blanket, a rug, a kennel pad, canvas etc.

WEEKS 4 AND 5

- Puppy mush is introduced
- Pen is expanded; pee pads are distanced from sleeping area, and a play area is added
- A kennel is placed in the sleeping area, with door left open.
- Potty training outside begins (weather permitting, otherwise we use a grass patch in our garage)
- Different types of toys are introduced periodically; such as soft toys, hard chews, balls, squeaky toys, hanging toys etc.
- Challenges are introduced; such as finding their way around objects, navigating on slick floors, going over or under etc.

WEEKS 6 AND 7

- Kennel training is continued
- First shots and vet examine
- Potty bell and clicker are introduced
- More difficult challenges are introduced; such as stairs, and more complex obstacles between them and their destination
- Puppies are separated during naps and at night

WEEK 8

- Final vet exam
- Puppy goes home
